Professional Summary

Full Stack Developer with 4+ years of experience building scalable web applications in the ecommerce and SaaS domains. Experienced in React, backend development, API integration, and end-to-end feature delivery. Currently leading a team of 4 engineers, driving code quality, performance optimization, and scalable application architecture. Skilled in feature development, code reviews, mentoring developers, and collaborating with cross-functional teams to deliver reliable, production-ready software.

Strong expertise in React Hooks, Redux Toolkit, state management patterns, REST APIs, reusable component systems, and performance optimization techniques. Experienced in **AI-augmented development workflows** - using Claude Code and Gemini directly within codebases by providing file structure, shared utilities, and contextual references to accelerate feature delivery, API integrations, and UI implementation from Figma via MCP.

Skills

- **Frontend:** React.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Next.js, React Router
- **CSS Libraries:** Material-UI (MUI)
- **State Management:** Redux Toolkit, Context API
- **Routing & APIs:** React Router, REST APIs, Axios, Authentication (JWT)
- **Performance Optimization:** Memoization (useMemo, useCallback), Lazy Loading, Code Splitting, CDN
- **Generative AI:** Gemini API, Prompt Engineering
- **AI & Developer Tools:** Claude Code, Gemini (in-editor), Github Co-Pilot, Figma MCP + AI (UI generation), Context-aware prompting, AI-assisted code reviews & testing
- **Testing:** Jest (Basic), React Testing Library (Basic)
- **Backend Exposure:** Node.js, Express.js, MongoDB
- **Tools:** Git, GitHub, Postman, VS Code, NPM, Agile/Scrum
- **Cloud Platform:** Google Cloud Platform (GCP)

Professional Experience

SDE - I

Twinleaves Retail Ecommerce India Pvt Ltd.

Bangalore | April 2023 – Present

- Led a team of 4 frontend developers, managing task planning, code reviews, and delivery timelines.
- Designed **scalable component architecture** using React Hooks and Redux Toolkit for a Retail Management System.
- **Optimized** inventory management screens, **reducing load time by 20%** through memoization and API response optimization.
- Implemented **reusable UI component**, reducing feature development time by 30%.
- Integrated secure REST APIs using Axios with **proper error handling and loading states**.
- **Reduced production bugs by 40%** through structured debugging and peer code reviews.
- **Analyzed React Native mobile codebase** and successfully replicated core business logic in React Web for B2C Grocery platform.
- **Improved filter/search performance by 30%** through optimized state management and controlled re-renders.
- Adopted **AI-augmented development** using Claude Code and Gemini within project files, reducing implementation time by providing context such as file structure, common functions, and references for faster code generation and debugging.
- Leveraged **Figma MCP with AI tools** to translate designs directly into React components, improving design-to-code accuracy and cutting UI development cycles.
- Used AI tooling to assist with **API integration, test case generation**, and code review suggestions, maintaining quality while accelerating delivery.

Professional Projects

Retail Management System (B2B SaaS Platform):

- Designed and developed inventory workflows handling large datasets with optimized rendering and API caching
- Implemented reusable component architecture using React Hooks & Redux

- Improved load time by **20%** through memoization and optimized API handling
- Integrated secure REST APIs with structured error and state management

B2C Grocery Web Platform:

- Converted mobile-first React Native workflows into scalable React web implementation. Implemented reusable component architecture using React Hooks & Redux
- Implemented product listing, filtering, cart management, and checkout features.
- Ensured responsive UI and performance consistency across devices.

Human Resource Management System (HRMS):

- Developed and enhanced multiple workforce management modules using React, Redux, and REST APIs.
- Implemented Attendance Management features including attendance tracking, regularization workflows, and reporting.
- Built Leave Management modules supporting leave requests, approvals, balances, and policy-driven validations.
- Developed Shift Assignment and Shift Roster functionalities for employee scheduling and workforce planning.
- Worked on Shift Scheduler and Shift Calendar modules to streamline shift allocation and calendar-based workforce visibility.
- Implemented Reports modules providing operational and employee-related insights through configurable reports.
- Contributed to Payroll Configuration features supporting payroll setup, rules management, and organization-specific configurations.
- Improved application performance and maintainability through reusable components, optimized API integrations, and scalable state management practices.

Additional Projects

Dine-In Partner (AI Chatbot for Restaurants)

- Built intelligent chatbot using Gemini API to provide dynamic food recommendations.
- Implemented chat-to-cart functionality with real-time UI updates.
- Developed frontend using React.js and Tailwind CSS with backend integration.

Key Achievements

- Reduced production bugs by **40%** through code quality initiatives
- Improved application performance by up to **30%** across core workflows
- Mentored 4 engineers and established code review standards
- Reduced feature delivery time by **30%** through reusable component system
- Integrated AI development tools (**Claude Code, Gemini, Figma MCP**) into team workflow, measurably accelerating feature delivery and reducing manual boilerplate.

Education

- **Full Stack Web Development | MERN Stack** *Apr 2022 - Mar 2023*
Masai School, Bangalore
- **Bachelor Of Technology | Computer Science Engineering** *Aug 2017 - June 2021*
St. Aloysius Institute of Technology, Jabalpur, Madhya Pradesh
